PROFILE

Embedded software engineer with experience in embedded systems and Edge AI, and a master's degree in Mechatronics Engineering. Background spanning engineering and applied research.

EXPERIENCE

Staff Embedded Software Engineer | Si-Vision
Current role | Employment: May 2022 - Present

Embedded Software Engineer | BarkoTel Communications
September 2021 - May 2022 | Full time
Embedded software development and on-device AI applications.

Machine Learning Research Assistant | German University in Cairo
January 2020 - January 2021 | Part time
Applied machine learning research for automotive suspension systems.

CubeSat Developer | German Aerospace Center (DLR)
July 2019 - September 2020 | Part time
CubeSat development and research involving microgravity experiments.

EDUCATION

MSc, Mechatronics Engineering | German University in Cairo | 2024 - 2025
Grade: A+ (95%). Thesis focus: ML models on embedded platforms for autonomous driving.

BSc, Mechatronics Engineering | German University in Cairo | 2016 - 2021
Bachelor's thesis: Excellent (98%).

SELECTED ACADEMIC PROJECT

Edge AI Adaptive Cruise Control
Master's project exploring an adaptive cruise control application based on Edge AI and a single camera.

CORE SKILLS

C | C++ | Python | Embedded systems | DSP | Embedded Linux
Edge AI | Machine learning | Model optimization | Git | CMake | Jenkins

LANGUAGES

Arabic: Native | English: Professional working proficiency
